

Women in Science

Biology is one of the few MINT subjects with a balanced ratio of genders among students. However, in advanced career stages, women are still underrepresented in Science. The research training group „Multi Senses – Multi Scales“ proudly hosts a workshop addressing the topic of ‚Women in Science‘, taking place on:

Thu, February 6th, 2020

3.30 – 5 pm

Room 1.011 (2nd Biology Building)

In this workshop, Dr. Beatriz Rico will give insights into her scientific career and discuss the obstacles of becoming a successful female scientist.

We would like to welcome students of all genders to raise awareness for the gender bias and promote equality in natural sciences, introducing a prominent role model for successful Women in Science and providing a platform for discussions.

For registration to the workshop please send a mail to jenice.linde@rwth-aachen.de

Prof. Dr. Beatriz Rico

**Professor of Developmental Neurobiology
King's College London**

After the workshop (5.15 pm), Dr. Rico will give a **Scientific Talk**, which will be entitled:

**Building Cortical Networks:
From Molecules to Function**

The talk is open for all interested students and colleagues and does not require registration.
